

What Christians Need to Pray About Regarding the Pathogens

Testing

While you are rejoicing about the lifting of lock-down, not so fast my friends. Each move from here on out is the unfurling of the global governance flag or banner over us. This is a nefarious operation of evil. Each successive wave will have new and shape-shifting torture and torments. This next phase includes removing children from loving homes.

It even begins in the hospital where the birth of a baby should be bringing untold joy to families but is silenced as the newly born baby is removed from its mother and is told it has died, and the mother cannot see it because of pathogens.

The global powers want, yea, demand your children as a sacrifice. Once removed from your Godly custodial care, they may live to become the toys of the elite or a sacrificed blood offering. It will depend upon their bloodline that is secured and mined in this harvesting of blood and is presented to the Quantum beast 'intelligence', animating it to life.

How is this? As with all predators, your Godly heritage, even before birth, is being stalked, selected and tagged for who will go where. They obtain vital information about your bloodline under the COVID testing digging deep into your family, and your unique secrets that Almighty God bestowed upon you. You must understand the foundation or cornerstone is your blood and the blood of your offspring, holy unto God. Think about this before you voluntarily submit your blood, your most precious asset beside His Spirit, and breath, to the beast system. Your blood and bloodline, containing the sacrificial Blood of Jesus, can never be willingly surrendered to the powers of wickedness.

And should it be decreed by these evil tyrants to murder these children, God's children, then they will believe they are doing God's work:

“They shall put you out of the synagogues: yea, the time cometh, that whosoever killeth you will think that he doeth God service.” John 16:2

This COVID testing is a harvesting and mining operation. Whether you have children or not, your blood will be used in rituals, experimentation, and

shared with countless researchers and engineers as all the rules and checks and balances of medical privacy, experimentation, and even the sanctity of life have been suspended. Cry to the Lord, ye people of God:

All the while, our eyes were failing as we looked in vain for help. We watched from our towers for a nation that could not save us. They stalked our every step, so that we could not walk in our streets. Our end drew near, our time ran out, for our end had come! Those who chased us were swifter than the eagles in the sky; they pursued us over the mountains and ambushed us in the wilderness...

Lamentations 4

There is no other way to look at this than that it is global child sacrifice. This is a war against humanity. Stand firm, my friends, refuse to consent to this ghastly evil behavior. Persevere, whatever the consequences, for the day of judgment is at hand. The Lord is peering down at you through the windows of heaven to see if you will stand with Him and His Word or fall for the deception and lies of the Beast of Prey.

Therapeutics

Therapeutic agents being developed target weaponized pathogens such as Ebola, hepatitis B virus, hepatitis C virus, herpes simplex, HIV, and deoxycytidine analogues that fight cancer. Their nucleotides are similar enough to be incorporated into mitochondrial DNA stands where they act as chain terminators. This causes serious side effects such as bone marrow suppression. DNA production by reverse transcriptase is different from normal human DNA replication. Researchers are designing nucleoside analogues.

Resistance can develop quickly with as little as one mutation. Simply put, mutations occur in the enzymes and activate the drug through a process known as phosphorylation. Your body struggles to combat this foreign chain reaction resulting in resistance. Physicians then must barrage your body with other drugs of the same kind to thwart your bodies natural response to foreign invaders.

You need to understand that these therapeutics employ pharmakeía utilizing from the root meaning "administer drugs". They are drug-related sorcery,

witchcraft, oftentimes include spells and enchantments, as well as the practice of the magical-arts.

Now the works of the flesh are manifest, which are these; Adultery, fornication, uncleanness, lasciviousness, Idolatry, witchcraft, hatred, variance, emulations, wrath, strife, seditions, heresies, envying's, murders, drunkenness, reveling, and such like: of the which I tell you before, as I have also told you in time past, that they which do such things shall not inherit the kingdom of God. Galatians 5

Throughout the Book of Revelation, we see pharmakeía and various poisons released upon the inhabitants of the earth.

We also need to examine Revelation 9, the plague of locusts that emerges from the fiery pit of hell. These were an army of demons, compared to locusts. It is likened to the eighth plague in Egypt was a devastating swarm of locusts. People who have never encountered these insects have little idea of the damage they can do. When God wanted to judge His people, He would sometimes send locusts to devour the harvests such as we are seeing today. But these creatures are different.

These are not literal locusts, because locusts do not have scorpion-like stings in their tails. These creatures do not devour the green vegetation; in fact, they are prohibited from doing so. This demonic army is given the assignment of tormenting all who have not been protected by the seal of God. In fact, it is likely that all who have trusted the Lord will be sealed in some special way and protected from torment.

The normal lifespan of the locust is about five months (May to September), and this is the length of time that the judgment will last. These demons will sting people and thus create such pain that their victims will actually want to die, but death will flee from them (Jer. 8:3).

Reading the detailed description of these creatures, we realize that John is not writing about ordinary locusts. Yet, despite its obvious symbolism, it aptly portrays a powerful enemy armed for battle. With bodies like horses but faces like men, the demons' heads are crowned and covered with long hair. They have teeth like those of lions, and their skin is like a coat of mail. When they fly, the noise is like an army of chariots rushing by.

Is it possible that the locusts being discussed are actually life-like demon hordes deployed into the bodies of men, women and children who take these

therapeutics to save their life, thus opening the door of their body, to the plagues and judgment of God? It would explain why these locusts do not go after green but only mankind.

The therapeutics today are engineered as hordes or swarms-marching as an army to invade your body. They do chew up your God given body as they assemble and multiply within the garment of your body. The rushing noise being the propaganda that lures you by fear to take in these destroying devils. Bring to your remembrance that there is a mighty army that comes from the east.

Real locusts do not have a king (Prov. 30:27), but this army follows the rule of Satan, the angel of the bottomless pit. His name is "Destroyer." "The thief [Satan] cometh not, but for to steal, and to kill, and to destroy" (John 10:10). Real locusts are pervasive destroyers, but this army only tortures those who do not belong to the Lord. Only God's people are saved, those with the His seal of protection. As we see the manifestation of God's judgmental locusts has this spiritual, demonic locust army been or about to be deployed?

As God's people, we can be thankful that Jesus Christ holds the keys of hell and death (Rev. 1:18) and exercises divine authority even over Satan. God has His timetable for all these events.

In Revelation 18:23, *Of their murders* drugs heads the list, but "sorceries" comes next. Pharmakon was originally enchantment, as also in Rev. 21:8, then drug. The two other items are fornication and thefts, old word, all four are characteristics of demonic worship and idolatry. There is a particularly bad odor about that rises from synthetic drugs - "patent medicines," that change your DNA.

"Thy merchants were the grandees" once, but now these merchant princes are gone. With thy sorcery and preparation of drugs, sorcery, and the magical arts, such as seen in Revelation 9:21 is seen. If one is puzzled over the connection between medicine and sorcery as illustrated by this word (our pharmacy), he has only to recall quackery today in medicine (patent medicines and cure-alls), witch-doctors, professional faith-healers, medicine-men in Africa. True medical science has had a hard fight to shake off chicanery and charlatanry. These charlatans passed off as physicians, always find plenty of victims.

Consider the sins that men and women will be committing:

Murder, theft, and various kinds of sexual immorality are rife in those days. The word translated “sorcery” is the Greek word pharmakia, which means “the use of drugs.” Drugs are often used in pagan religious rites and demon worship.

Things will not look bright for God’s people during this middle stage of the prophetic journey, but they will still be overcomers through the power of the King of kings and Lord of lords!

Vaccines

Originally, there were a total of 48 different vaccines that were being consider for the pathogen de jour, but I understand that it has now escalated to around 72. These vaccinations include:

- **Aborted babies**
- **Humanized Mice**
- **Humanized Plants**
- **Sterilize**
- **Carry out other operations in your body**
- **Toxic adjuvants used to activate or make stronger the vaccine**

The news is abuzz with the revelation of the Luciferinase which means bright or light (Corona anyone) which is an enzyme that activates the binary vaccination weapon.

Hear the Word of the Lord

I will join evils to them. My plagues will destroy them., they will be swollen with hunger, be eaten by the birds, and plagued with evil winds, and the teeth of wild beasts will I set loose among them with the fury of serpents that crawl in the dust.

For a fire has flared in My fury... These are the fires of Gehinnom or hell.

They shall be burnt with hunger, and devoured with burning heat, and with bitter destruction: I will also send the teeth of beasts upon them, with the poison of serpents of the dust.

...

Their wine is the poison of dragons, and the cruel venom of asps.

Is not this laid up in store with me, and sealed up among my treasures?

Deuteronomy 32: 24, 33, 34

24/7 Surveillance and Traceability

All life must be surveilled and managed according to the global elite who fashion themselves as gods and goddesses of this earth. It was Beta-Tested on animals and has moved into the human sphere. The technology being deployed will accomplish all three objectives of the United Nations global National Animal Identification System, now mandatory, known by the name, Traceability:

- **All property is owned by the government and has an asset number, real, human or animal**
- **All biological life is electronically identified, this may include DNA or blood barcoding for more information**
- **24/7 Surveillance**

When reviewing documents from the United Nations it is critical to understand that humans and animals are interchangeable and that, in fact, in the early 2000's, animals were declared with primacy over humans legally and in academia.

In the UN's own words:

Traceability is defined as:

- **Ability to follow an animal or group of animals during all stages of its life.**
- **Animal welfare means how an animal is coping with the conditions in which it lives. An animal is in a good state of welfare if (as indicated by scientific evidence) it is healthy, comfortable, well nourished, safe, able to express innate behavior, and if it is not suffering from unpleasant states such as pain, fear and distress.**
- **Good animal welfare requires disease prevention and treatment, appropriate shelter, management, nutrition, humane handling and**

humane slaughter/killing [according to UN standards, not generally accepted and accepted animal husbandry practices].

In this light, the first program initiated both in China and the US during the current pathogen was mental health because just prior to the pathogen going global it was determined the Americans and people in general did not have the internal fortitude to deal with the stress of any disaster.

Mental Health Replaces God

In the early hours of the pathogen Mental Health Frameworks, [Link](#), were deployed:

[COVID-19 Behavioral Health Resources - ASPR TRACIE - HHS.gov](#)

The federal government is taking steps to protect American's physical and behavioral health in response to the 2019 Novel Coronavirus pandemic. The resources in this collection were created by federal agencies and their partners to help healthcare providers, caregivers, and the general population prepare for and manage the negative behavioral effects that can accompany a public health emergency.

[SAMHSA Awards Grants Expanding Community-Based Behavioral ...](#)

The Substance Abuse and Mental Health Services Administration (SAMHSA) ... Behavioral Health Services, Strengthens COVID-19 Response ... mental illness during the COVID-19 pandemic,” said HHS Secretary Alex Azar.

[HHS Launches Statewide COVID-19 Mental Health Support Line ...](#)

This new resource offers COVID-19-related mental health support for all Texans. People can call the Statewide COVID-19 Mental Health Support ...

The American Psychiatric Association recently surveyed and addressed Faith, Community, and Mental Health during the COVID- 19 Crisis.

They concluded:

□ Nearly half of Americans (48%) are anxious about the possibility of getting coronavirus.

□ Nearly four in ten Americans (40%) are anxious about becoming seriously ill or dying from coronavirus.

□ Far more Americans (62%) are anxious about the possibility of family and loved ones getting coronavirus.

One in four people who seek help for mental health concerns turn to faith leaders before they seek help from clinical professionals which is why most clergy are hooked into the demonic beast system and compromised by being:

- **503c**
- **Clergy Response Teams, now under National Voluntary Organizations Active in Disaster (NVOAD), which is under FEMA**
- **Faith Based Initiative**

The government messaging to you people of faith is to be taken as Gospel truth, because they are the “trusted Sources” in the war between trust in God or Trust in Man under the auspices of Satan:

The outbreak of COVID- 19 may be stressful for people. Fear and anxiety about a disease can be overwhelming and cause strong emotions in adults and children. Coping with stress will make you, the people you care about, and your community stronger.

- **Prolonged stress may exacerbate already existing or underlying psychological disorders. It also may trigger stress reactions like panic, anxiety, and depression. Additionally, families not accustomed to spending so much time in close quarters may see relationships strained.**
- **It is important to remember parents and caregivers.**
- **Parents juggling the requirements of work with the challenge of homeschooling their children may need your support.**
- **Community faith leaders often serve as their community’s caregivers and should be remembered and served as they serve their community.**
- **The CDC also has guidance for addressing stress and anxiety related to COVID19 and specific guidance for faith and community leaders.**
- **SAMHSA has guidance and resources to assist individuals, providers, communities, and states across the country. Taking care of your Behavioral Health is a helpful resource to consider the mental health impacts of social distancing and how to address them.**

- **SAMHSA's Mental Health Technology Transfer Centers are also providing online training and technical assistance related to COVID- 19.**
- **SAMHSA's Serious Mental Illness Advisor (SMI Advisor) has a page with additional information.**
- **SAMHSA also has a helpful resource for talking with children, which includes tips for Caregivers, Parents, and Teachers during infectious disease outbreaks like COVID- 19.**

Christian American Association of Christian Counselors (AACC) has a resource page related to COVID- 19. The Beyond Disaster program from the Trauma Healing Institute provides materials to help people recover from natural and man- made disasters and may be helpful in addressing individuals whose mental health may be affected by the coronavirus outbreak.

The program integrates best practices in mental health into a biblical framework.

FREE PDF <https://disasterrelief.bible>.

Spiritual First Aid from the Humanitarian Disaster Institute offers a step- by- step approach to learning and providing care for others remotely and while staying at home.

Reboot Alliance developed their REBOOT Recovery Crisis Edition based on their work helping people overcome trauma together for nearly a decade. Reboot Recovery Crisis Edition is a FREE, five- part web series to help people cope with the current crisis.

The Presbyterian Mission Agency (PMA) has posted a wealth of resources to address the mental health impacts of COVID- 19. This includes how to address Mental Health Well- Being during a Pandemic.

Key Ministry is collecting a number of resources to address coronavirus.

Fresh Hope is hosting Mental Health Monday's online and promoting a resource to address anxiety related to coronavirus.

My Quiet Cave is offering online support groups.

Why is the church going with the UN Mental Health Framework rather than calling for their congregations to:

- **Believe in Jesus and you shall have eternal life**
- **Repent**
- **Call upon God in this time of trouble**
- **Learn the Bible for verses on perseverance, hope, steadfastness, and all biblical character traits**
- **Trust in the Holy Spirit for guidance**

The 24/7 Surveillance Options

BarCode for Life (CBOL)

<https://phe.rockefeller.edu/barcode/>

<https://shepherdsheart.life/blogs/news/mark-of-the-reptilian>

The next step was to convene a Consortium for the Barcode of Life (CBOL) is an international initiative dedicated to supporting the development of DNA barcoding as a global standard for species identification. Eventually, you will not be able to buy or sell or participate in anything unless AI verifies your DNA providing you access to beast system interaction.

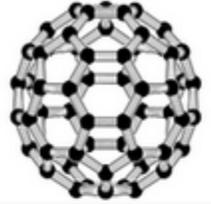

CBOL's Secretariat Office is hosted by the National Museum of Natural History, Smithsonian Institution, in Washington, DC. Barcoding was a way of distinguishing and identifying species with a short standardized gene sequence. The team includes the International Barcode of Life Project (iBOL), all headquartered at the University of Guelph. The [Barcode of Life Data Systems](#) (BOLD) is also located at the University of Guelph.

Possibly you are familiar with the [Alfred P. Sloan Foundation](#). They are a sponsor of the many of the popular survival reality television series, watching modern man struggle in primitive environments. All the while documenting to see if man could survive the challenges of those days. While it was entertaining they precisely documented how mankind would fare in primitive conditions. Since then, more than 200 organizations from more than 50 countries have joined CBOL and agreed to put their barcode data in a public database.

Quantum dots (QDs) are tiny [semiconductor](#) particles a few [nanometres](#) in size, having [optical](#) and [electronic](#) properties that differ from larger particles due to [quantum mechanics](#). They are a central topic in [nanotechnology](#). When the quantum dots are illuminated by UV light, an electron in the quantum dot can be excited to a state of higher energy. In the case of a [semiconducting](#) quantum dot, this process corresponds to the transition of an electron from the [valence band](#) to the [conductance band](#). The excited electron can drop back into the valence band releasing its energy by the emission of light. This light emission ([photoluminescence](#)) is illustrated in the figure on the right. The color of that light depends on the energy difference between the [conductance band](#) and the [valence band](#).

In the language of [materials science](#), nanoscale semiconductor materials tightly confine either electrons or [electron holes](#). Quantum dots are sometimes referred to as artificial atoms, emphasizing their singularity, having [bound](#), discrete [electronic states](#), like naturally occurring [atoms](#) or [molecules](#).^{[1][2]} It was shown that the electronic [wave functions](#) in quantum dots resembles the ones in real atoms.^[3] By coupling two or more such quantum dots an artificial molecule can be made, exhibiting hybridization even at room temperature.^[4]

Quantum dots synthesized by plasma are usually in the form of powder, for which surface modification may be carried out. This can lead to excellent dispersion of quantum dots in either organic solvents[27] or water[28] (i. e., colloidal quantum dots).

Fabrication

- Self-assembled quantum dots are typically between 5 and 50 nm in size. Quantum dots defined by [lithographically](#) patterned gate electrodes, or by etching on two-dimensional electron gases in semiconductor heterostructures can have lateral dimensions between 20 and 100 nm.
- Some quantum dots are small regions of one material buried in another with a larger [band gap](#). These can be so-called core-shell structures, e.g., with CdSe in the core and ZnS in the shell, or from special forms of [silica](#) called [ormosil](#). Sub-monolayer shells can also be effective ways of passivating the quantum dots, such as PbS cores with sub-monolayer CdS shells.^[29]
- Quantum dots sometimes occur spontaneously in [quantum well](#) structures due to monolayer fluctuations in the well's thickness.

Atomic resolution [scanning transmission electron microscopy](#) image of an InGaAs quantum dot buried in GaAs.

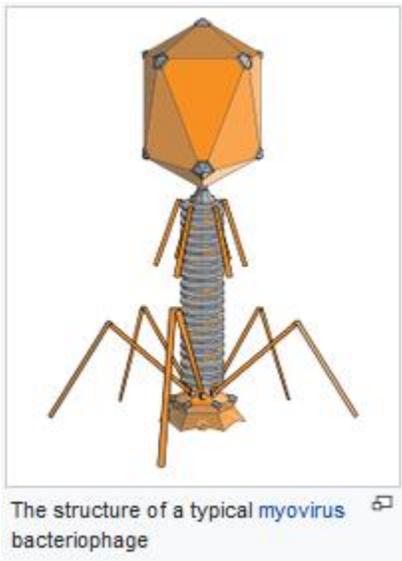

- Self-assembled quantum dots nucleate spontaneously under certain conditions during [molecular beam epitaxy](#) (MBE) and [metalorganic vapour-phase epitaxy](#) (MOVPE), when a material is grown on a substrate to which it is not lattice matched. The resulting [strain](#) leads to the formation of islands on top of a two-dimensional [wetting layer](#). This growth mode is known as [Stranski–Krastanov growth](#).^[30] The islands can be subsequently buried to form the quantum dot. A widely used type of quantum dots grown with this method are In(Ga)As quantum dots in GaAs.^[31] Such quantum dots have the potential for applications in [quantum cryptography](#) (i.e. [single photon sources](#)) and [quantum computation](#). The main limitations of this method are the cost of fabrication and the lack of control over positioning of individual dots.
- Individual quantum dots can be created from two-dimensional electron or hole gases present in remotely doped quantum wells or semiconductor heterostructures called [lateral quantum dots](#). The sample surface is coated with a thin layer of resist. A lateral pattern is then defined in the resist by [electron beam lithography](#). This pattern can then be transferred to the electron or hole gas by etching, or by depositing metal electrodes (lift-off process) that allow the application of external voltages between the electron gas and the electrodes. Such quantum dots are mainly of interest for experiments and applications involving electron or hole transport, i.e., an electrical current.
- The energy spectrum of a quantum dot can be engineered by controlling the geometrical size, shape, and the strength of the confinement potential. Also, in contrast to atoms, it is relatively easy to connect quantum dots by tunnel barriers to conducting leads, which allows the application of the techniques of tunneling spectroscopy for their investigation.

The quantum dot absorption features correspond to transitions between discrete, three-dimensional [particle in a box](#) states of the [electron](#) and the hole, both confined to the same [nanometer](#)-size box. These discrete transitions are reminiscent of atomic spectra and have resulted in quantum dots also being called [artificial atoms](#).^[32]

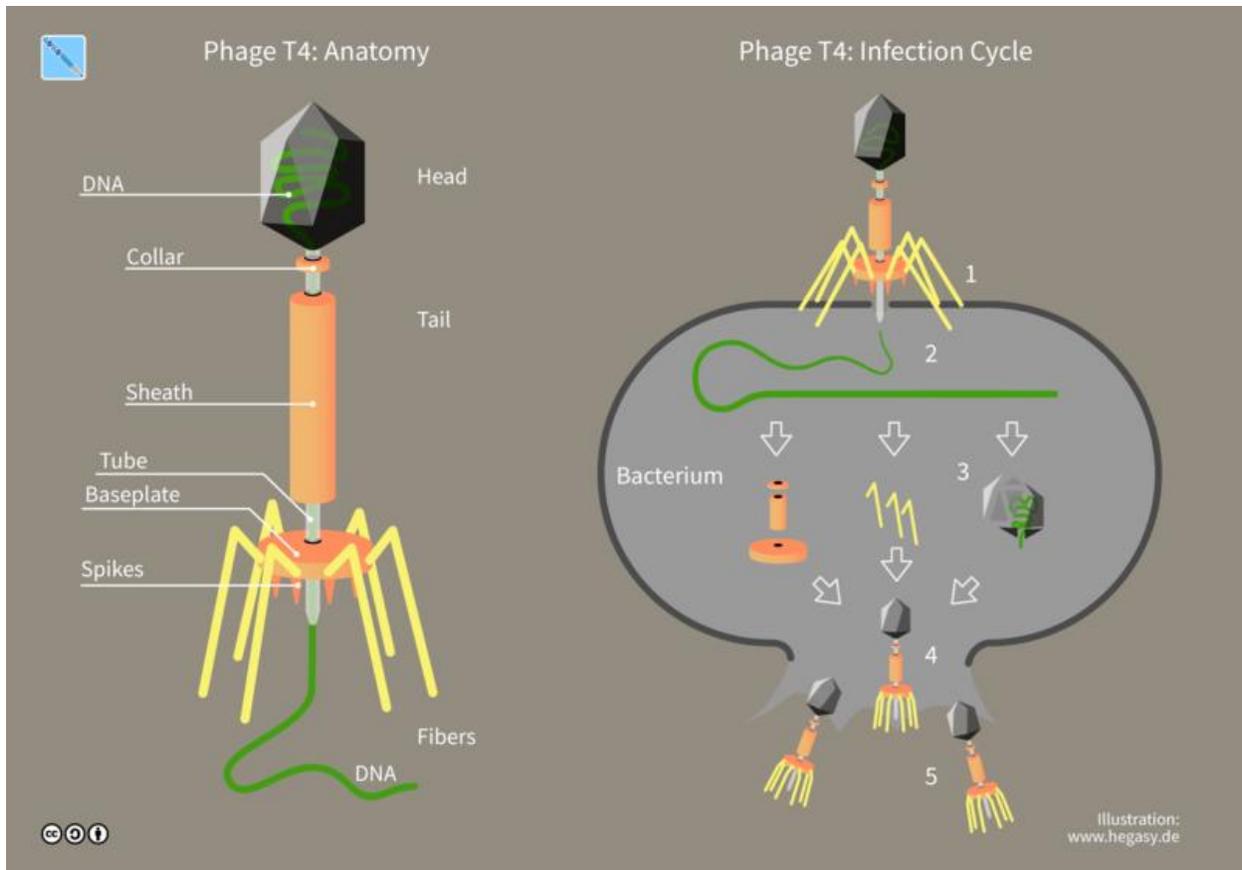

- Confinement in quantum dots can also arise from [electrostatic potentials](#) (generated by external electrodes, doping, strain, or impurities).
- [Complementary metal-oxide-semiconductor \(CMOS\)](#) technology can be employed to fabricate silicon quantum dots. Ultra small ($L=20$ nm,

W=20 nm) CMOS transistors behave as single electron quantum dots when operated at cryogenic temperature over a range of $-269\text{ }^{\circ}\text{C}$ (4 [K](#)) to about $-258\text{ }^{\circ}\text{C}$ (15 [K](#)). The transistor displays Coulomb blockade due to progressive charging of electrons one by one. The number of electrons confined in the channel is driven by the gate voltage, starting from an occupation of zero electrons, and it can be set to 1 or many. [\[33\]](#)

Viral assembly

Genetically engineered M13 bacteriophage viruses allow preparation of quantum dot biocomposite structures.

A bacteriophage (/bæk'tɪəriəʊfɛɪdʒ/), also known informally as a phage (/feɪdʒ/), is a virus that infects and replicates within bacteria and archaea. The term was derived from "bacteria" and the Greek φαγεῖν (phagein), meaning "to devour". Bacteriophages are in the Black Mats during other Extinction Level Events and in Biofilms where mats of bacterial conceal in a persons body making treatment extremely difficult.

It had previously been shown that genetically engineered viruses can recognize specific [semiconductor](#) surfaces through the method of selection by [combinatorial phage display](#).^[35] Additionally, it is known that [liquid crystalline](#) structures of wild-type viruses (Fd, M13, and [TMV](#)) are adjustable by controlling the solution concentrations, solution [ionic strength](#), and the external [magnetic field](#) applied to the solutions. Consequently, the specific recognition properties of the virus can be used to organize inorganic [nanocrystals](#), forming ordered arrays over the length scale defined by liquid crystal formation. Using this information, Lee et al. (2000) were able to create self-assembled, highly oriented, self-supporting films from a phage and [ZnS](#) precursor solution. This system allowed them to vary both the length of

bacteriophage and the type of inorganic material through genetic modification and selection.

Electrochemical assembly

Highly ordered arrays of quantum dots may also be self-assembled by [electrochemical](#) techniques. A template is created by causing an ionic reaction at an electrolyte-metal interface which results in the spontaneous assembly of nanostructures, including quantum dots, onto the metal which is then used as a mask for mesa-etching these nanostructures on a chosen substrate.
